DETAILED ACTION

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach or suggest an inkjet printer ink cartridge comprising: an ink cartridge body having a plastic ink receptacle, a top cover, a strainer, a spring and a rubber washer; a strainer support elevated from a bottom of the ink receptacle by a retaining wall with a recess below said strainer adapted to receive said spring and said rubber washer, being further adapted to connect to a nozzle area of a printer; and a equilibration tube configured within said ink receptacle of said ink cartridge body, extending from the top of the ink receptacle to the bottom, having an opening at the bottom for fluid communication at the bottom of said ink receptacle, and connected at the top of said ink receptacle to a passage in two-way fluid communication with the atmosphere external to the ink receptacle; wherein ink can be refilled into said ink receptacle of said ink cartridge body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hsieh et al. (US 6186620 B1) disclose a tube to allow air to enter and exit the fluid container; however, it do not disclose the tube extending from the top to the bottom of the ink receptacle.
